

# *Ozone Laundry.... ....With a Brain!*

**ArtiClean OLSC  
Ozone Laundry Smart Controller**

Introducing our new patent pending Ozone Laundry Smart Controller (OLSC). The OLSC actually monitors the ozone laundry system, including the ozone levels, at all times. With the OLSC, the operators can be assured that all systems are working properly and that the ozone levels remain consistent in order to kill bacteria. Should the system malfunction or ozone levels drop below an unsafe level to properly disinfect, the operators are warned at once.

The OLSC is also responsible to help maintain consistent and reliable results in the wash process.

*If you would like to make your laundry a Profit Center, call the Laundry Experts at ArtiClean Ozone Laundry Systems.*
